SPECIAL ANTI-ROTATION VACUUM CUP HOLDERS WITH SPHERICAL SWIVEL SUPPORT

Their fixing support is made with aluminium and is composed of two parts that, screwed together, allow to block the spherical joint, thus keeping the vacuum cup holder in place.

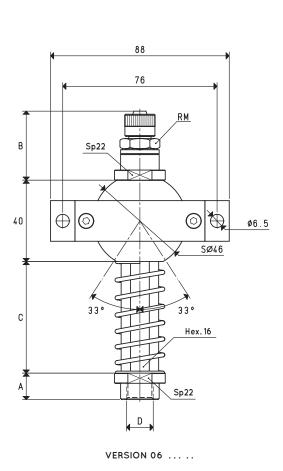

They are suited for cups with a diameter between 40 mm and 200 mm, although they are especially useful for the assembly of rectangular or elliptical vacuum cups.

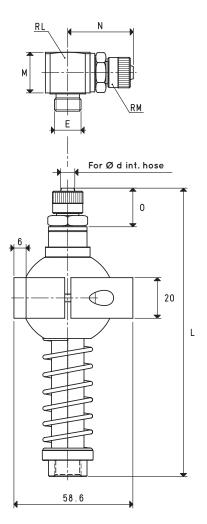

The actual springing stroke is:

- For height C= 55 mm 37 mm - For height C= 110 mm 84 mm

place and keep the cup in the desired place.
